EXPERIENCE

Graphext

2020–Present

Senior Data Scientist and Software Engineer
Madrid / Remote, Spain

Developed and automated data analysis workflows, including NLP (e.g., topic modeling), churn prediction, lead scoring, and other predictive models.
Designed scalable LLM-powered features and AI agents for natural language interaction, enabling code-free execution of complex tasks like topic modeling and model deployment.
Built and deployed high-performance LLM-based agents capable of processing massive datasets (hundreds of millions of rows) using parallelization and advanced prompting.

Graphext

2018–2020

Data Scientist and Software Engineer
Madrid / Remote, Spain

Built high-performance Electron.js scrapers with proxy management, collecting hundreds of millions of data points from social networks.
Developed secure, large-scale data pipelines and a custom DSL with static typing and validation strategies for efficient data processing.
Created dashboards and visualizations to analyze global demographics, delivering insights on Catholic youth for Pope Francis.

WePlan Analytics

2017–2018

Data Science Internship
Madrid / Remote, Spain

Built predictive models to profile user behaviour from telecom data using MongoDB.

EDUCATION

PhD in Artificial Intelligence

2023–2026

Cardiff University

Thesis: Tabular Reasoning Through Large Language Models.
Advisors: Jose Camacho Collados at University of Cardiff and Eugenio Martínez Cámara, Luis Alfonso Ureña López at University of Jaén.
Focused on modernizing the field of Tabular Reasoning by providing benchmarks and a new framework for analyzing tabular data structures in the context of NLP..

MSc in Language Technologies (NLP)

2022–2023

Universidad Nacional de Educación a Distancia (UNED)

Graduated with distinctions, 9.1/10. MSc Thesis on Synthetic Data Generation for Multiple Choice Question Answering.

Double Bachelors in Computer Science and Mathematics

2014–2019

Universidad Complutense de Madrid

Highly competitive program resulting in two four-years Bachelor degrees.

PROJECTS

DataBench

https://huggingface.co/datasets/cardiffnlp/databench

Thousands of monthly downloads. Modern benchmark for Question Answering over Tabular Data. Focus of the first part of my PhD thesis. It includes a large set of industry datasets and QA evaluation and diagnosis tools.

DataBenchSPA

https://huggingface.co/datasets/SINAI/databenchSPA

Spanish version of DataBench. It includes a smaller set of industry datasets and QA evaluation and diagnosis tools.

ACL 2025 - SemEval Task 8: Question Answering over Tabular Data

https://www.codabench.org/competitions/3360/

Planned and led this competition where over 300 participants from all over the world submitted solutions to the proposed challenge, including top companies and universities. 35 different research papers were submitted for the task, one of the highest counts in the history of Semeval.

RESEARCH

Question Answering over Tabular Data with DataBench: A Large-Scale Empirical Evaluation of LLMs

LREC-COLING 2024

This paper presents a comprehensive evaluation of large language models in question answering over tabular data using the DataBench benchmark. - https://aclanthology.org/2024.lrec-main.1179/

Towards Quality Benchmarking in Question Answering over Tabular Data in Spanish

SEPLN 2024

This paper explores quality benchmarking for question answering over tabular data in Spanish, providing insights into model performance. - http://journal.sepln.org/sepln/ojs/ojs/index.php/pln/article/view/6617

SemEval 2025 Task 8: Question Answering over Tabular Data

SemEval at ACL 2025

This study goes over the different systems submitted to the SemEval 2025 Task 8, providing a comprehensive overview of the task and its results. Pre-print available at https://github.com/jorses/semeval-2025-t8/blob/main/Semeval_2025_Databench_task_paper.pdf

TECH STACK

Languages: Python, SQL, JavaScript, TypeScript, C++, Ruby

Frameworks/Libraries: PyTorch, TensorFlow, scikit-learn, PyArrow, Pandas, NumPy, React, Node.js, Electron

Tools/Platforms: Git, Docker, AWS, Azure, GCP

Expertise: Machine Learning, Deep Learning, NLP, Computer Vision, Data Visualization, Statistical Analysis

LANGUAGES

Spanish: Native

English: Bilingual

Chinese (中文): HSK 4 – Intermediate (read/write)
